

# INTEGRATING SENDGRID SERVICE

Date	15 NOVEMBER 2022
Team ID	PNT2022TMID17124
Project Name	Personal Expense Tracker Application

## SendGrid Integration With Python Code

To send emails from the application we need to integrate the SendGrid Service. Please reference link.

The screenshot shows an IDE window with a terminal at the bottom. The terminal output shows the installation of python-http-client and SendGrid. The output is as follows:

```
Try the new cross-platform PowerShell https://aka.ms/pscore6

Collecting python-http-client>=3.2.1
  Using cached python_http_client-3.3.7-py3-none-any.whl (8.4 kB)
Installing collected packages: starkbank-ecdsa, python-http-client, sendgrid
  DEPRECATION: starkbank-ecdsa is being installed using the legacy 'setup.py install' method, because it does not have a 'pyproject.toml' and the 'wheel' package is not installed. pip 23.1 will enforce this behaviour change. A possible replacement is to enable the '--use-pep517' option. Discussion can be found at https://github.com/pypa/pip/issues/8559
  Running setup.py install for starkbank-ecdsa ... done
Successfully installed python-http-client-3.3.7 sendgrid-6.9.7 starkbank-ecdsa-2.2.0
PS E:\7th Sem\pythonProject\sendgrid>
```

### Code:

```
import sendgrid
import os
from sendgrid.helpers.mail import Mail, Email, To, Content

sg = sendgrid.SendGridAPIClient(api_key=os.environ.get('SENDGRID_API_KEY'))
from_email = Email("thamotenyson@gmail.com")
to_email = To("20euit510@skcet.ac.in")
subject = "Personal Expense Tracker Application"
content = Content("text/plain", "IBM Nalaiya Thiran Project")
mail = Mail(from_email, to_email, subject, content)

mail_json = mail.get()

response = sg.client.mail.send.post(request_body=mail_json)
print(response.status_code)
print(response.headers)
```
